

Nulogx is named to List of 100 Great Supply Chain Partners

TORONTO, Ontario (PRWEB) July 9, 2006 -- Nulogx Inc., a leading supply chain execution provider of Transportation Management Software (TMS) and Services, announced today it has been named to the list of 100 Great Supply Chain Partners published in the July 2006 *Global Logistics & Supply Chain Strategies (GL&SCS)* magazine.

"Nulogx provides timely consulting to support our evolving transportation and logistics business requirements," said Frank Sokol, Systems Implementation Manager, at a major logistics services company. "This support has helped us to transition from reactive administered transportation to an optimized transportation network that provides superior service and reduced costs to our internal and external customers."

During the past six months, logistics and supply chain professionals were asked to complete a survey nominating top-performing vendors and service providers based on 10 common qualities: value / cost savings, reliability, exceptional performance, expertise and knowledge base, problem-solving abilities, continuous improvement, support, positive culture, global capabilities and comprehensive service. The 100 Great Supply Chain Partners were chosen from over 1,800 nominations from over 400 different companies based on their ability to make a significant impact on their company's efficiency, customer service, and overall supply chain performance.

"Nulogx is committed to delivering leading-edge technology solutions that enable our customers to differentiate their business value," said Travis-James Smith, VP Consulting Services, Nulogx Inc. "We are honored to be acknowledged as a global logistics leader."

About Nulogx

Nulogx is the leading innovator of Transportation Management Solutions built for the IBM iSeries. The objective to *Deliver Real Return on Logistics* is realized every day by companies from 3PL, manufacturing, distribution, healthcare, retail, and life sciences industries.

Nulogx enables customers to significantly reduce operational costs and improve service by automating processes that combine inbound and outbound shipment data with real-world business constraints. With visibility across the entire transportation business cycle, Nulogx customers manage planning, routing and load optimization, execution and financial settlement activities. 7 of the top 10 leading North American 3PLs depend on Nulogx Solutions every day, managing over 2 billion dollars of transportation movements annually.

Nulogx Services utilize the proven TRACK Implementation Methodology, which significantly enhances customer service, reduces total cost and accelerates profitability. Nulogx professionals provide practical, world-wide experience and expertise that *Deliver Real Return on Logistics*.
